

Natural Power - Internal & External Onshore Blade Inspections Case Study

Project:	Confidential
Client:	EDF Energy Renewables
Project Description:	Ground based inspections to 19 WTG's.
Services Provided:	External and internal blade inspection services to 19 No. Senvion MM82-2.0MW
Performance delivered, including strategic value to the client	The blade inspections were completed as part of an End of Warranty campaign which was required at very short notice and during challenging weather conditions in December 2016. The inspections identified a potentially catastrophic defect resulting in 2 No. turbines being taken out of service until further examination / rectification could be completed.
