

Our managed service provision oversees the operation of your site and ensures that all of your contractual and regulatory obligations are being fully discharged.

Owning a site brings with it a wide range of responsibilities. Acting as clients representative onsite we will ensure that the operation and maintenance provider is running the site in your best interests in addition to ensuring that all of your contractual obligations as a site owner are covered.

The services we offer for large renewable heat projects include:

- Client's representative onsite, supervising, approving and reporting on the activities of the O&M provider
- Regulatory compliance and guidance on future regulatory change
- Submissions to Ofgem and CHP-QA on behalf of client
- Project Performance Review Model
- Health and Safety Auditing
- Insurance Reviews
- Remote online monitoring and reporting via Portal
