

Natural Power Site Management

Natural Power provides operational services to over 2.1GW of onshore wind throughout the UK. This currently equates to approximately 26%* of the UK's onshore capacity.

Our Wind Farm Managers (WFM), act as the owners' representative ensuring the smooth running of the site and that issues affecting production are rapidly resolved.

Natural Power ensures that the wind farm is maintained and operated in line with all relevant legislation, guidelines and industry best practise to ensure the highest levels of health and safety and with regard for the environment and all project stakeholders.

The WFM ensures that:

- All personnel working on the farm do so in a controlled, documented and safe manner through strict adherence to latest Health and Safety guidelines
- All works are undertaken in accordance with manufacturer published specifications, procedures and spare part utilisation
- Regular site inspections are completed
- Work is co-ordinated with the ControlCentre to manage site activities, review method statements, risk assessments and Approved Written Procedures (AWPs) for all work completed on site
- As the senior authorised person for High Voltage (HV) switching work, they are available for operational switching, reinstatement of site or managing emergency situations

Services provided:

- Asset recording
- Budgeting
- Commercial management and associated admin
- Reporting
- Site fault and maintenance
- HV management including:
 - Implementation of the Natural Power Safety Rules to cover the wind farm HV network
 - Designated HV system operator
 - Implementation of Planned Preventative Maintenance (PPM)
 - Maintenance of O&M documentation
 - Provision of an HV appointed person call-out service
 - Stakeholder relations
