

# Natural Power - Planning Monitoring Officer (PMO) Case Study

<b>Project:</b>	Glen App Wind Farm
<b>Client:</b>	Scottish Power Renewables
<b>Project Description:</b>	The project is based near Cairnryan in South Ayrshire with planning consent for 11 turbines.
<b>Services Provided:</b>	<p>Monitor the site during construction to ensure that the development complies with the approved plans, environmental statement and planning conditions. Regular reporting to client and South Ayrshire Council (SAC) of development's progress and matters of default.</p> <p>The PMO role was extended by request of SAC to help with the discharge of outstanding suspensive planning conditions.</p>
<b>Added Value:</b>	<p>With the help of Natural Power's advanced involvement, pre-commencement conditions were discharged timeously thus allowing the client to begin construction in a timeframe still capable of meeting its deadline for the Renewable Obligation Certificate (ROC). Establishing a good working relationship with the client and Environmental Clerk of Works has helped to manage compliance on site.</p>
